## Living Independently at Home with Peace of Mind

Do you know that 10,000 people will turn 65 every day for the next 20 years!

While older Americans are committed to staying in their homes, 13.3 million seniors fall at home each year. Philips LIFELINE, who created the medical alert business 30 years ago, has now developed the innovative service. The Auto Alert **automatically** detects a fall and gets people help immediately even if they are unable to press the button.

This life-saving, very affordable service is for people with diabetes, prone to strokes or heart attacks, and those who fall frequently.
